

Finding it difficult to remove the Sticker from the Backing?

Try the steps below

1

Image 1: This image shows the basic way. Peel away from one end of the sticker, slightly bending to make a gap.

2

Image 2: This shows the way for a stubborn sticker.

Apply a small piece of tape to the front side (very small amount, so not to affect the sticker) and another piece on the other side (paper side). The tape will be back to back, and then you can peel both ways and remove the sticker.

If you are still have a problem, after following all the instructions, on the leaflet and Website, please let us know. We will request the return of the stickers, so we can check them for you.
